

**PACKAGE CONTENTS:**

- 1 Clay Chimney (A)
- 1 Clay Body (B)
- 1 Metal Stand (C) MADE IN MEXICO

**ASSEMBLY INSTRUCTIONS:**

1. Find a flat, level surface.
2. Place clay body (B) on metal base (C), ensuring the ridge aligns with the base.
3. Then, place clay chimney (A) on top of body (B). Estimated assembly time: 3 minutes

**Recommendations for Handling****General tips:**

- For OUTDOOR USE ONLY.
- Apply a waterproof concrete sealer for added protection.
- Keep a fire extinguisher nearby but never extinguish fire with water.
- Supervise around children and pets.
- Never leave fire unattended.
- Avoid touching the Chimenea while in use.
- Ensure Chimenea is dry before use.

**Handling:**

- Terracotta is fragile; avoid dropping or banging it.
- Carry Chimenea by gripping the mouth and supporting the neck-bowl junction.
- Alternatively, lift from the base with care and place on the iron stand.

**Location:**

- Place your Chimenea on a level, non-flammable surface, away from anything that could catch fire.

**General Maintenance:**

- • Keep your Chimenea covered when not in use to prevent water damage. In freezing temperatures, store it indoors or cover it with a plastic cover.

**Usage:**

- Insulate the bowl with sand or pea stone, leaving 3-4 inches below the mouth's lower lip.
- Use two bricks as a grate to elevate wood.
- Start with small fires to season your Chimenea, using kindling or fat wood.
- Avoid using lighter fluid or any flame enhancers.
- Once seasoned, you can burn larger fires, but keep them controlled and centered to prevent damage. Remember, Chimeneas are for small fires and not as primary heat sources.
